

## GREAT FOR:

- Fine detailed designs
- Lightweight cotton or poly T-shirts
- Fast production

# CAD-CUT® FASHION-FILM® BEST CHOICE FOR T-SHIRTS

Stahls' CAD-CUT® Fashion-FILM® was engineered to easily cut finely-detailed designs that require a thin, soft hand for lightweight garments.

## PRODUCTION FRIENDLY

- The sticky carrier of Fashion-FILM makes it ideal for easily weeding detailed, intricate designs.
- The hot peel ensures there is no stressing or distorting of the design when removing the carrier.
- With a 2-second tack for base layers, a 15 second application time, and a hot peel, production is fast and simple.

*"Since we started using CAD-CUT® Fashion-FILM® our business has increased tremendously. Fashion-FILM allows us to provide a multitude of vibrant colors and a material that will outlast the competition by far. As a business man I can strive for no greater achievement than to offer my clients the best quality product for less than the competition. My customers are constantly impressed by the quality of our presses even after years of wear. Thank you Stahls!"*

– Brian & Dorenda Fox, SewnTogether

## COLOR OPTIONS FOR DESIGN POSSIBILITIES

- With a huge range of color options, from sport and fashion colors to neon and metallic finishes, the design possibilities are endless.
- Metallic and neon finishes are the same price as other colors allowing you to create unique designs with a higher markup.

## SOFT & LIGHTWEIGHT

Fashion-FILM is incredibly soft and lightweight, only 88 microns thick, so it's ideal for decorating tanks, T-shirts and other lightweight garments.
