

# CAD-CUT® Soft Metallic Heat Transfer Vinyl

Foil like finish with a soft feel

The easiest way to get the look of foil in one easy step. It gives apparel the softest stretchiest feel and the trendy metallic look your customers want.

## GREAT FOR:

- 1-step application
- Finely detailed designs
- Application on stretchy & heat sensitive fabrics

## QUICK, 1-STEP APPLICATION

Not only is the 1-step application quicker than a foil + adhesive application. Soft Metallic heat transfer vinyl eliminates the foil pinholes common on cotton shirts when using foil.

## FINELY DETAILED DESIGNS

Create even the most intricate designs with fine details. A pressure sensitive carrier makes weeding easy, without lifting or moving designs off the carrier.

## SOFT ON STRETCHY & HEAT SENSITIVE FABRICS

Soft Metallic Heat Transfer vinyl gets softer, with a brushed metallic look when laundered. It applies at 285°F so it's a good option for application on heat sensitive and stretchy fabrics.
