

CAD-CUT® THERMO-FILM® WORLD'S #1 ATHLETIC HEAT TRANSFER MATERIAL

GREAT FOR:

- Contact sport jersey decoration
- Cotton, polyester
- Fast application

Stahls' CAD-CUT® Thermo-FILM® provides enhanced abrasion-resistance and durability, ideal for use on full-contact sports jerseys and uniforms. Not only is it lab-tested to withstand wash after wash, but it's been proven on the field to outlast the life of the jersey itself.

DURABLE, ABRASION RESISTANT

Thermo-FILM is the best choice for full-contact sports such as football and lacrosse. In most cases the material will outlast the life of the garment. Thermo-FILM has been lab certified to withstand 50 wash and dry cycles without cracking, peeling, or lifting.

SUPERIOR OPACITY

Thermo-FILM has superior opacity that inhibits dye migration on polyester jerseys.

TIME IS MONEY

Thermo-FILM's fast & easy application makes it a winner for jersey decoration and personalization.

- Sticky backing makes for easy weeding.
- Apply a name and number in only 6 seconds.
- Peel hot for instant results.

“I’ve seen it where the jersey rips, and it gets to the number, and it just stretches it. It’s holds on brilliantly.”

– Lou Lipa, Chesterfield Sporting Apparel
